

Energize Your Dog With

ELEC-TRO-BYTES

The first treat to be designed
containing electrolytes

We at **Volhard Nutrition** developed **ELEC-TRO-BYTES** especially for our own dogs. We didn't want to reward them with a treat that just filled them up or smelled good. We wanted a treat that actually did something. **ELEC-TRO-BYTES** not only provides valuable minerals, but

also help to replace electrolytes lost in exercising or training. These treats are ideal for training, stuffing interactive toys or daily use. **ELEC-TRO-BYTES** have the added advantage of not soiling your pockets. They can be broken in half for small dogs and puppies.

Each package contains over **240 TREATS**
